## PROJECTS

### CLIENT SERVER ARCHITECTURE MODEL USING OPENGL

- It is a simple simulation created using OpenGL which illustrates the working of a client server architecture in computer networks.
- It illustrates the concept of the 3-way handshake.
- It is made using OpenGL, where I have used C++ as the programming language.
- Technologies Used** – C++, GLUT, OpenGL.

### QUIZ MANAGEMENT SYSTEM

- This is a simple Quiz webapp that lets the admins create various types of Quiz and students can register and access these quizzes.
- This webapp will keep a track of a student's progress and let an admin monitor it.
- The website is responsive to be used on all devices.
- Technologies Used** – PHP, HTML, CSS, JS, Bootstrap, MySQL

---

## COURSES & CERTIFICATIONS
